MUHAMMED SALMAN

Android Developer | Kotlin • Jetpack Compose • MVVM • REST APIs

+91-8089103518 | muhammedsalman183547@gmail.com | LinkedIn | GitHub | Kerala, India (open to relocate)

SUMMARY

Android Developer with 1+ year of production experience in Kotlin, Jetpack Compose and MVVM. Contributed to 20+ Android apps and independently shipped 5+ apps to the Google Play Store across finance, e-commerce, attendance, church management and enterprise ERP. Owns features end-to-end: defining REST API contracts with backend teams, building scalable Compose UI, and shipping code that handles real workloads (500+ daily records, 1,000+ orders). Builds reusable component libraries that cut delivery time on later projects.

TECHNICAL SKILLS

Android: Kotlin, Java, Android SDK, Jetpack Compose, XML Views, Android Jetpack, Material Design

Architecture: MVVM, Clean Architecture, Repository Pattern, Dependency Injection

Networking & Data: REST APIs, JSON, API Integration, Local Storage

Firebase: FCM, Authentication, Firestore, Storage, Crashlytics, Analytics

Other: Flutter, Performance Optimization, Debugging, Git/GitHub, Android Studio, Figma, Data Structures & Algorithms, OOP

EXPERIENCE

Android Developer, Oges Infotech *May 2025 – Present | Kerala*

- Contributed to 20+ Android apps and independently built and published 5+ apps on the Google Play Store (finance, e-commerce, attendance, church management, enterprise ERP) using Kotlin, Jetpack Compose and MVVM.
- Refactored legacy UI and API-handling code, reducing average screen load times and reported UI bugs by 30%.
- Built reusable Jetpack Compose component libraries; the church app template was reused across 5+ client deployments, cutting setup time from weeks to days.
- Worked directly with clients and backend teams to define REST API contracts for ERP and attendance systems handling 500+ daily records/transactions.

Flutter Developer Intern, Leopard Tech Labs *May 2023 – Jun 2023 | Startup Valley, AJCE, Kerala*

- Built a Flutter food delivery app from scratch with REST API integration for menus, orders and real-time order status; delivered a maintainable, responsive UI handed off to the core team.

PROJECTS

CredenceAI – Personal Finance Manager | *Kotlin, Jetpack Compose, On-Device Intelligence*

- Privacy-first finance app: a notification-listener service parses UPI, wallet and bank alerts entirely on-device, so no financial data leaves the phone.
- Rule-based parsing engine classifies transactions by merchant, category and payment method in real time, removing manual entry for 80%+ of transactions.

Church Management App Template | *Kotlin, Jetpack Compose, REST APIs*

- Modular white-label app (member directory, events, announcements, donations) designed for reuse; deployed for 5+ clients, standardizing onboarding, theming and admin workflows.

ES Global – Attendance Management System | *Kotlin, Jetpack Compose, NFC, Face Recognition, REST APIs*

- Multi-modal check-in (face recognition and NFC card) with enrollment flows, separate employee/admin authentication, bulk history views and record management built for 500+ employees at peak clock-in.

Meat Delivery E-Commerce Platform | *Kotlin, REST APIs*

- Dual-app platform (customer and delivery agent): browsing, cart/checkout, live order tracking and agent order-queue workflows; supported 1,000+ orders end-to-end.

Vincent Tyres LLC – Workshop ERP | *Kotlin, Jetpack Compose, REST APIs*

- End-to-end job-card ERP: intake, inspection, job costing, stock tracking, quotations/approval and pre-invoicing QC, replacing a paper-based process and reducing handoff errors.

Petrocool – Complaint Management Module | *Kotlin, REST APIs*

- Complaint raising with attachments, admin triage dashboard, and an automatic escalation workflow with a response timer that reassigns unresolved complaints to another admin.

EDUCATION

B.Tech, Information Technology – Amal Jyothi College of Engineering, Kerala *2021 – 2025 | 7.4 CGPA*

ACHIEVEMENTS

- Finalist, Smart India Hackathon 2024 (Software Edition) – built a 3D educational game for children.
- 1st Place, UI/UX Design Competition, IEEE SB Vadakara (2024); 2nd Place, UI Design Hackathon, M. Dasan Institute of Technology (2024); Finalist, Hackengers Hackathon – Livewire (2024).
